

ACUMEN Portfolio 5

Overview

REVOLUTIONARY THINKING

ACUMEN Portfolio 5

ABOUT TAVISTOCK WEALTH

Tavistock Wealth manages over £1 billion of assets on behalf of all clients. The firm aims to provide its customer base with access to institutional quality portfolio management at a retail price. Tavistock Wealth is a subsidiary of Tavistock Investments Plc, the UK wide financial services group.

INVESTMENT PHILOSOPHY

The fund management industry has experienced significant change in the last quarter of a century. Product innovation has enabled investors to benefit from wider exposure to global financial markets with far greater efficiency and at a lower cost. Index-tracking investments such as Exchange Traded Funds (ETFs) have grown increasingly important and form the building blocks for all investments managed by Tavistock Wealth. We believe an actively managed, globally allocated, multi-asset portfolio, comprised of low-cost ETFs with diversified holdings in equity, bond, commodity and property markets is statistically more likely to outperform a traditional “stock picking” manager most of the time.

INVESTMENT TEAM

John Leiper is the Chief Investment Officer of Tavistock Wealth and carries direct responsibility for all investments in the Centralised Investment Proposition at the firm. Together with the research and investment team, he manages the ACUMEN Portfolios and the Tavistock PROFILES.

John Leiper
Chief Investment Officer

ACUMEN Portfolio 5

ACUMEN PORTFOLIOS

The ACUMEN Portfolios are low cost sub-funds of the ACUMEN Open Ended Investment Company (OEIC) and are comprised of index tracking ETFs. The portfolios provide multi-asset, global coverage with wide diversification across shares in companies, bond, commodity and property markets. The portfolios are regulated to the “gold” standard of European regulation - UCITS compliant. The Authorised Corporate Director for the ACUMEN Portfolios is Investment Fund Services Limited.

INVESTMENT OBJECTIVE

The aim of ACUMEN Portfolio 5 is to increase in value, over a minimum of 5 years, by investing in a range of asset classes and global markets. This will be achieved through a combination of capital growth, which is profit on investments held, and income, which is money paid out of investments such as dividends from shares and interest from bonds.

The portfolio aims to outperform its Market Composite Benchmark over any 3-year period, however, there is no certainty this will be achieved. For more information on the Market Composite Benchmark please refer to the fund prospectus.

INVESTMENT POLICY

ACUMEN Portfolio 5 will be actively managed, on a low medium risk strategy. It will aim to maintain a risk rating classification of 5, as set by an independent risk profiling company. The independent risk profiling company has a risk rating range from 1 (lowest risk) to 10 (highest risk).

The portfolio will invest in a number of different asset classes across global markets, including shares in companies, bonds, property and commodities. The asset class exposure over an investment cycle will broadly reflect the Market Composite Benchmark as defined below.

PERFORMANCE TARGET – MARKET COMPOSITE BENCHMARK

The Market Composite Benchmark for ACUMEN Portfolio 5 is comprised as follows:

- **35% Bonds** -
 - Bloomberg Barclays Global Aggregate Bond GBP Hedged Index (30%)
 - Bloomberg Barclays Global High Yield Bond GBP Hedged Index (5%)
- **60% Equities** -
 - MSCI World Index GBP Hedged (53%)
 - MSCI Emerging Markets Investable Market Index (7%)
- **5% Cash** -
 - Sterling Overnight Index Average (5%)
