REVOLUTIONARY THINKING

MANAGER COMMENTARY

The ACUMEN Equity Portfolio (GBP) returned -6.69% in December. The Market Composite Benchmark and the IA Global sector returned -8.11% and -6.92% respectively. The portfolio has a rolling 1-year return of -10.15%.

During the month, the US Federal Reserve's Open Market Committee voted unanimously to raise interest rates by a quarter point and forecast two further rate hikes next year. Jay Powell, Fed chairman, remains very upbeat on the US economy stating he saw no need to reduce the pace of quantitative tightening from the current 'autopilot' setting. Investors, accustomed to a more supportive Fed, had been expecting a more dovish outlook and markets sold-off as a result. In the US, the Nasdaq 100 fell into bear market territory, whilst across the Atlantic, the Stoxx Europe 600 fell to a 2-year low. The US dollar fell against a basket of currencies, pricing in a shallower path for future interest rate rises. The US government yield curve flattened to just 9bps, based on the spread between 2 and 10-year Treasuries, its lowest level in over a decade. Meanwhile, investment grade and high yield corporate bond spreads continued to widen. The risk-off environment, fuelled by concerns over a slowing global economy, drove Brent oil to its lowest level in 15-months, closing at \$50.47 per barrel. The Bloomberg Commodity Index, which reflects a broad basket of commodities, fell -6.72%. Safe-haven assets cushioned against some of the losses. The Japanese yen rose 3.44% against the US dollar and gold has rallied more than 9% since mid-August, finishing at \$1,282.73 per ounce. It has been a very difficult end to the year, and the month of December will go into the history books as one of the most volatile on record. 2018 was a roller-coaster year for bond, equity, commodity and currency markets. For many, it was a timely reminder that after years of nothing-but-positive returns, markets can go down as well as up. Overall, the portfolios performed in line with our high expectations and we are well positioned heading into next year. Wishing you all a successful and prosperous 2019!

INVESTMENT PHILOSOPHY

The fund management industry has experienced significant change in the last quarter of a century. Product innovation has enabled investors to benefit from wider exposure to global financial markets with far greater efficiency and at a lower cost. Index-tracking investments such as Exchange Traded Funds have grown increasingly important and form the building blocks for all of the portfolios managed by Tavistock Wealth. We believe an actively managed, globally allocated, multi-asset portfolio, comprised of low-cost ETFs with diversified holdings in equity, bond, commodity and property markets is statistically more likely to outperform a traditional active manager almost all of the time.

INVESTMENT OBJECTIVE

The investment objective of the ACUMEN Equity Portfolio is to deliver long term capital growth by investing in a range of global financial markets. The portfolio is typically comprised of higher risk investments such as equities.
